FOR SCHOOL

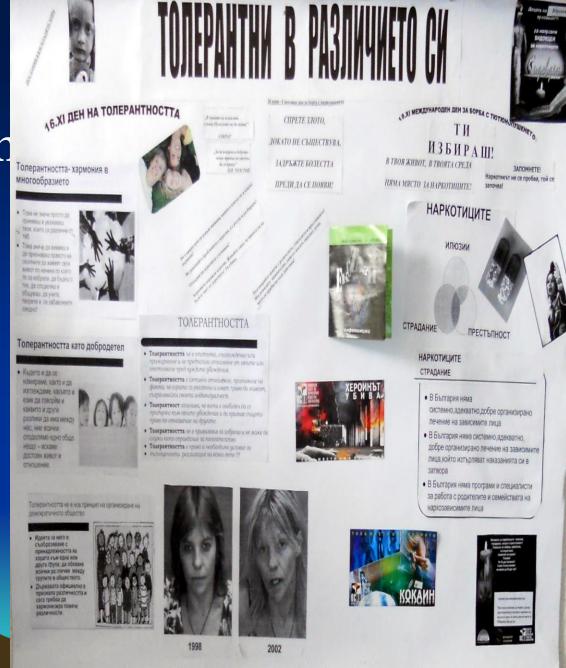

Our school is the only institution in the village and it is

located in a region with rich historical heritage which will contribute to cultural exchanges between pupils, teachers and institutions

 Following our motto "Toleran in a diversity" we are determined to succeed in our modest but strong endeavors.

We live in an area where there are different religions

but we are tolerant and we live in a Pease and understanding.

We help students and parents who are unable to complete their education..

• Bulgarian children will in turn realize their heritage and understand the common belonging to Europe and European values

Teachers strive to make the school more attractive territory and desirable area for students.

Each teacher is committed to create a cozy and creative atmosphere in the classroom.

FOR STUDENTS

Here students are trained in two stages, initial stage and main stage.

Our students have not the advantage of living in a big city and have all of them new, but the expense, they have the opportunity to live in a place where violence, crime and drugs are foreign to people!!!

For them the most important things are family, friends, school and society.

Therefore, we decided that we can join the project, which is connected with students`future. And why now? We know 2015 is an European year of development and we want to have real opportunity to build their future and learn more about other countries and cultures.

Our school takes part in activities such as competitions, festivals and projects.
